

RATNAKAR SHARMA

ratnakarsharma1014@gmail.com | +91 73476-65345 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Science professional with hands-on experience in **machine learning, deep learning, and computer vision**. Skilled in **Python, SQL, TensorFlow, OpenCV, and Flask** with expertise in **object detection, NLP, Data analysis, model optimization and fine-tuning** with a proven track record of developing and optimizing AI-driven solutions.

ACADEMIC DETAILS

Daksh Gurukul IIT Guwahati Credit Linked Program in Data Science	January 2025 – Present
Punjabi University, Patiala B.Tech, Computer Science; CGPA 8.73/10	2020 – 2024
Government Senior Secondary School, Mandi Phul 12 th (non-Med); 91.55%	2018 – 2020

EXPERIENCE/TRAINING

Sabudh Foundation – Mohali, India

Data Scientist

January 2024 – July 2024

- Conducted **research** on various **object detection** models such as **YOLO** and **MobileNetSSD_V1**.
- Collaborated on **real-time projects** involving data collection and model fine-tuning.
- Optimized model performance, achieving **15% improvement in accuracy** by fine-tuning hyperparameters.
- Led a 6-week training program** for students at Guru Granth Sahib World University on data science and machine learning topics.

National Institute of Electronics and Information Technology, Chandigarh

Python with Data Science And Machine Learning

Intern

July 2022 – August 2022

- Completed comprehensive training on **data science** and **machine learning** using Python.
- Utilized libraries like Numpy, Pandas, Matplotlib, and Seaborn for data manipulation and visualization.
- Developed a **movie recommendation system** and led the project team through its completion.

PROJECTS

Object Detection – Mohali, India

<https://github.com/Ratnakar-kaushal/Object-detection>

An **Object Detection** webapp trained on custom dataset

Data Scientist

January 2024 – July 2024

- Tech Stack:** Python, TensorFlow, OpenCV, Flask, HTML, CSS
- Developed an **object detection model** trained on a **custom dataset**.
- Researched and implemented** various object detection models including **YOLO** and **MobileNetSSD_V1**.
- Collected and **prepared data** for training and **fine-tuning the models**.

CROP DISEASE DETECTION – Punjabi University, Patiala

<https://github.com/Ratnakar-kaushal/Crop-Disease-Detection>

Machine Learning based Crop Disease Detection Webapp.

Data Science and ML Engineer

June 2023 – July 2023

- Tech Stack:** Python, Keras, TensorFlow, OpenCV
- Developed a machine learning model** for detecting crop diseases.
- Processed 10,000+ labeled images to train the classifier, achieving 89% accuracy.

WATCHA-PEDIA – NIELIT, Chandigarh

<https://github.com/Ratnakar-kaushal/Movie-Recommendation-System>

Movie recommender system

Data Science and ML Engineer

July 2022 – August 2022

- Tech Stack:** Python, NLP, Scikit-learn, Pandas
- Completed hands-on training on data analysis, machine learning, and Python automation.
- Led the team in developing a machine-learning model to recommend movies based on user preferences.
- Performed **exploratory data analysis (EDA)** and implemented text vectorization using **NLP techniques**.

SKILLS

Technical Skills

Python | C++ | SQL | OOPS | Machine Learning | Deep Learning | CNN | Computer Vision | OCR | NLP | Datalku | Flask | Data Visualisation | Data analysis

Management Skills

Time Management, Communication, Project Management

INTEREST AND HOBBIES

Chess
Writing
Drawing

CERETIFICATIONS

Data Science and ML Intern Certification by **NIELIT** – June 2022
PCAP Python Certificate from Cisco Networking – August 2022
Hackathon Position Certificate – September 2022
GDSC **ML Core** Certificate – July 2022
